

Registered Nurse (RN)

Job Summary:

Equality Health Center is looking for a Full Time Registered Nurse to join our team. The ideal candidate is invested in evidence-based practices and seeks a nursing career rooted in purpose, providing compassionate sexual and reproductive healthcare to patients. Our clinic cares for a diverse population of patients seeking GYN, LGBTQIA+, STI/HIV, and abortion & reproductive care. The nurse is responsible for assisting our practitioner while providing education and/or treatment to patients with various concerns/ needs. The nurse will assess needs, obtain health histories, administer medication, monitor and record patient progress, and educate patients as needed.

General Responsibilities and Tasks:

- Bases nursing actions by applying principles of purposeful, organized thinking to make clinical judgment/decisions.
- Gathers data through history taking and physical assessment and interprets data in order to plan and implement interventions to meet patient care needs.
- Develops, evaluates and revises patient's plan of care and nursing actions in response to patient's needs.
- Documents care provided and patient's progress toward attainment of desired outcomes.
- Teaches the patient and/or significant other(s) about the plan of care. Prepares patients to manage their care in an outpatient setting, or preparation for procedure/test.
- Manages time and resources to deliver patient care.
- Dispense, administers medications to patients per Provider orders.
- Provides education/training for patient self-administration of injectable medications when applicable.
- Provides direct patient care.
- Performs nursing role specific requirements withing NH Nursing License and other duties assigned.

- Collaborates with the Clinical Team and Executive Director to enhance and implement Quality Assurance & participates in case review processes.
- Collaborates on management of infection and exposure control.
- Perform monthly emergency equipment and medication evaluation.
- Inventory and order medication supplies.
- Follow standard provider orders for medication refills.

Qualifications and Experience:

- Preferred bachelor's degree in nursing but would consider ASN. Current RN licensure in NH
- Minimum 3 years office / outpatient RN experience, preferably in sexual and reproductive health care/gyn setting.
- Certification required: Current American Heart Association Basic Life Support for Healthcare Providers certification, or equivalent course credentialed by American Heart Association.
- Excellent oral and written communication skills
- EMR fluency
- Experience preferred working with LGBTQIA+ clients

Benefits include health care, dental, vision, generous paid time off & sick leave, and professional development.
